

CORPORATE ANNOUNCEMENT

STEVE C. MUSULAK, P. Eng.
Senior Geotechnical Engineer

Mr. Steve C. Musulak P.Eng. and Mr. Ian Jones P.Geol., P.Geo. have recently joined Complete Crossings Inc. (CCI) in our geotechnical division. CCI provides Engineering, Environmental, and Construction Services for trenchless and open cut crossings in Canada.

Steve Musulak has over thirty five years of experience in civil and geotechnical engineering in Western Canada. He has completed hundreds of geotechnical investigations for a wide variety of industrial, municipal, and pipeline related projects and has also been extensively involved in the construction materials testing industry. For the last 10 years, Steve has focused on being a consultant to the oil and gas industry with an emphasis on pipeline routing and the geotechnical evaluation of trenchless crossings.

IAN JONES, M.Sc., P.Geol. P.Geo.
Senior Engineering Geologist

Ian Jones began his career as an engineering geologist in 1976. He has practised for more than thirty years on a wide variety of geotechnical assignments throughout western and northern Canada, and in South America. Ian has a broad range of engineering geology experience but his recent focus has been consulting on oil and gas pipelines and other linear projects.

Ian has appeared as an expert witness before the National Energy Board and the (Alberta) Energy Resources Conservation Board, and acted as a review consultant for the Natural Resources Conservation Board.

We are privileged to have Steve and Ian join our team and look forward to working with all our clients in our expanded capacity.
